## THE IDEA BEHIND THE PROJECT

The project “ELEVATION” is one of the Erasmus+ projects, designed within the framework of cooperation between the EU, which aims to strengthen the capabilities in adult education.

Task of engaging marginalised adults in education and training has never been an easy one. The ELEVATION project proposes to attract reluctant learners back to education and training using a comprehensive new approach that ignores the traditional institution based provision focused on subjects and instead pursues a more open and expansive provision based on embedded learning techniques and 'open-house' community learning festivals.

What ELEVATION proposes is breaking new ground in the sphere of adult education provision for those currently on the margins of lifelong learning.

The project's results will be in-service training for adult education professionals to support their continuous professional development and their use of the proposed embedded-learning mini-learning-format key competence resources and the new on-line bespoke e-learning environments.

All products, resources and course-ware produced by the ELEVATION consortium will be available as Open Educational Resources to any interested party, in all partner languages.
