

PROJECT NEWSLETTER 3

September 2020

REMINDER: WHAT IS ELEVATION ABOUT?

What ELEVATION proposes is breaking new ground in the sphere of adult education provision for those currently on the margins of lifelong learning.

The ELEVATION PROJECT helps marginalised adults to build key skill sets that they can take with them throughout their life, as they become increasingly important core skills for life, for work and for inclusion.

COMING NEXT...

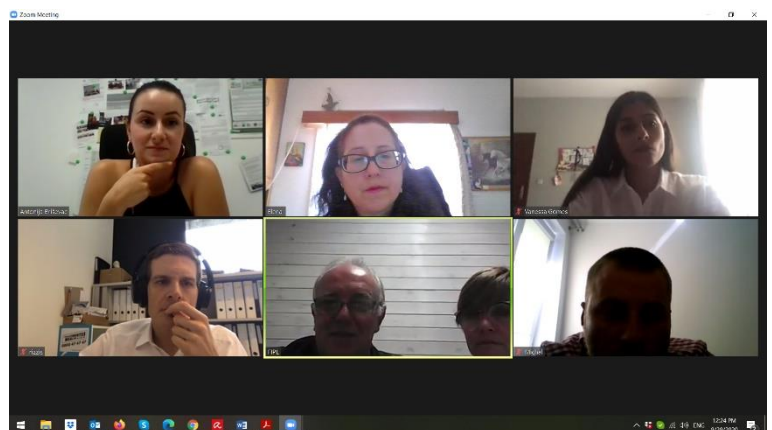

During the coming months, a partnership is planning to:

- Finalize the translation of all developed materials in all partner languages
- Complete all development work on the portal and upload all training content
- Focus primarily on dissemination of the E-learning Platform and multiplier events that will help to promote ELEVATION in partner countries of the project.

WELCOME TO THE THIRD NEWSLETTER OF THE “ELEVATION” PROJECT!

The sanitary situation in Europe has considerably slowed down the activities of the ELEVATION project. Indeed, after having developed and translated the project resources, the consortium was about to test them in real conditions with the project's target populations. Unfortunately, COVID-19 prevented the consortium from carrying out its plans.

Therefore, the partnership is arranging online meetings and making active communication through emails in order to be able to conduct all the planned activities.

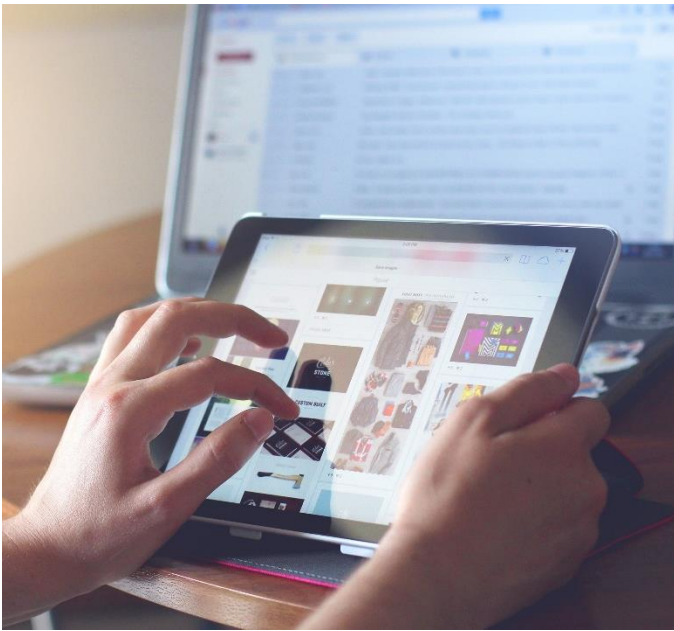

MULTIPLIER EVENTS

COMMUNITY LEARNING FESTIVAL

“A Community Learning Festival” event will specifically focus on engaging marginalised adults in learning through the new festival activities developed.

All partners will host at least one such multiplier event during the project life-cycle. A minimum of 30 disadvantaged adults will attend the piloting events.

FINAL CONFERENCE

The lead partners will also host a Final Conference to coincide with the partner meeting in Croatia when all project outputs will be presented. An appropriate key-note speaker will be invited to officially present the project outputs.

A minimum of 70 education professionals and managers will attend the final conference where all pedagogic outputs will be presented along with testimonials of people who participated in the community learning festivals.

TRANSNATIONAL TRAINING EVENT

The In-Service Training Program will comprise a total of 40 hours of learning. 3-day Transnational Training Event (TTE) will take place in Ireland to be attended by 12 educational professionals from partner organizations. Staff participation is essential if the desired cascading model of training is to be achieved.

The tutors attending the TTE will support the local training delivery in a cascading model of training. A skills demonstration will be a key element of the In-Service training and this will entail the development of skills acquisition in a range of media production areas by each tutor who participates. This ensures continuous professional development of adult education professionals which can support the inclusion of marginalised groups in any educational setting.
